

Update Templates to collect RPPO communication on events and sharing information about pests of concern

THIRTY-SIXTH SESSION

TECHNICAL CONSULTATION AMONG REGIONAL PLANT PROTECTION ORGANIZATIONS

UPDATE TEMPLATES TO COLLECT RPPO COMMUNICATION ON EVENTS AND SHARING INFORMATION ABOUT PESTS OF CONCERN

AGENDA ITEM 4.1

(Prepared by the IPPC Secretariat)

- [1] During the TC-RPPO meetings the group noticed that there is a great amount of important and interesting events being organized and taking place in different regions. To make this information available and to promote participation across regions, the TC-RPPO prepared a draft template to use as a mechanism for this purpose.
- [2] It was agreed that each RPPO contact point will communicate to the TC-RPPO future regional events using this draft, considering enough time to facilitate other NPPOs or RPPOs participation and in subsequent meetings amendments to the template were made.
- [3] Two templates were developed for the TC-RPPO to communicate and collaborate on events within the regions and identify pests of regional concerns. The papers in the attachment are open for discussion and review for further guidance, approval, and implementation.
- [4] The TC-RPPO is invited to:
 - (1) *Note* the paper and its attachments 1 and 2 (templates on regional events and pests of interests).
 - (2) *Review* and approve the attachment to this paper and recommend its implementation for use among regional plant protection organizations.
